

Summary

Full-Stack Developer experienced in building web applications and backend systems using React, Node.js, Express.js, REST APIs, and authentication. Experienced in designing application architecture and integrating AI-powered features. Strong foundation in DSA, OOP, and DBMS with a CGPA of **9.09**.

Education

Chaitanya Bharathi Institute of Technology (CBIT)	2024 – 2028
B.E. Computer Science Engineering	CGPA: 9.09

Technical Skills

Languages:	Java, Python, JavaScript, TypeScript, C++
Frontend:	React.js, HTML5, CSS3, Vite, Framer Motion
Backend:	Node.js, Express.js, FastAPI, REST APIs, JWT, RBAC
Databases:	MongoDB, PostgreSQL, Prisma
AI / CV:	ONNX Runtime, Face Detection, Face Recognition, Liveness Detection
Tools:	Git, GitHub, Postman, VS Code
Core CS:	DSA, OOP, DBMS

Projects

PoultryOps — Management & Biometric Platform 🐙 GitHub Live
React.js — Node.js — Express.js — PostgreSQL — FastAPI

- Designed the architecture and core backend for workforce, attendance, analytics, authentication, and role-based operations.
- Built REST APIs for employee, farm, shed, attendance, analytics, and authentication workflows with RBAC and secure sessions.
- Integrated FastAPI + ONNX for face detection, liveness verification, face recognition, and 512-D embeddings for biometric attendance.
- Implemented public analytics and Face AI demos with zero-PII aggregated metrics and ephemeral biometric sessions for testing.

Full-Stack Blog Platform 🐙 GitHub
React.js — Node.js — Express.js — MongoDB

- Built a full-stack blogging platform with JWT authentication, HTTP-only cookies, protected routes, and REST APIs.
- Implemented RBAC, CRUD operations, image uploads using Multer and ImageKit, backend validation, Helmet, and API rate limiting.
- Developed a responsive React frontend with reusable components, dynamic navigation, and Framer Motion animations.

F1 Racing Data Dashboard 🐙 GitHub Live
React.js — REST APIs

- Built an interactive F1 dashboard displaying drivers, constructors, races, and championship standings.
- Integrated the Ergast API with client-side caching to reduce redundant requests and improve loading performance.
- Created reusable React components and responsive SVG visualizations for interactive race and championship data.

Developer Portfolio Website 🐙 GitHub Live
HTML — CSS — JavaScript

- Designed and developed a responsive portfolio showcasing projects, technical skills, and achievements.
- Implemented interactive UI components, smooth scrolling, responsive layouts, and modern animations.
- Optimized performance, accessibility, and cross-browser compatibility for a consistent user experience.
