SUMMARY

Full-Stack Developer with strong expertise in scalable backend systems and high-performance web applications. Maintaining a **9.33 CGPA** at CBIT. Skilled in the MERN stack, REST API design, and secure authentication systems including **JWT, RBAC, and API validation**. Focused on building production-ready, secure, and efficient applications.

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT) 2024 – 2028
Computer Science Engineering
GPA: 9.33

Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS

SKILLS

Languages: Java, Python, C++
Web: JavaScript, HTML, CSS
Frameworks: React.js, Node.js, Express.js
Concepts: Data Structures, OOP
APIs: REST APIs
Tools: Git, GitHub, VS Code
Core Strengths: Problem Solving, Debugging, Logical Thinking

PROJECTS

Full-Stack Blog Platform React, Node.js, Express, MongoDB
GitHub

- Built scalable full-stack blogging platform with REST API backend.
- Implemented secure authentication using **JWT + bcrypt + HTTP-only cookies**.
- Designed **RBAC system** for admin/user permissions.
- Developed CRUD APIs for posts, users, and comments.
- Integrated **Multer + ImageKit** and secured app using Helmet and rate limiting.

Modern Blog Frontend Client React, Vite
Live Demo — GitHub

- Built responsive frontend with protected routes and dynamic routing.
- Integrated backend APIs using Axios.
- Added animations using **Framer Motion**.
- Created reusable UI components.

F1 Racing Data Dashboard React, REST APIs
Live Demo — GitHub

- Developed dashboard for drivers, teams, races, standings.
- Integrated **Ergast API** for real-time data.
- Implemented caching using React hooks.
- Built SVG-based race visualizations.

Developer Portfolio Website HTML, CSS, JavaScript
Live Demo — GitHub

- Designed responsive portfolio website.
- Built interactive UI using modern CSS and JavaScript.
- Optimized performance and loading speed.
